AIG	<p>August 5-After reviewing our current COVID-19 Underwriting Guidelines against the latest medical research, we have revised our guidelines for cases where the applicant had a medical condition (co-morbidity) which potentially made them more susceptible to COVID-19 and its more severe health impacts. Going forward, cases with only one of the allowed co-morbidities (noted in bulletin in the last column) may be allowed if the co-morbidity is the only reason the case was, or would be, paused or postponed, and the applicant is under 70 years old. This applies to both new submissions and cases that have been paused or postponed. Statement of Health (PHS) still required on all policy approvals. For individuals aged 70+, all cases postponed. Substandard guidance remains unchanged, though we will have the ability to make some substandard decisions (nothing greater than Table D) depending on individual case co-morbid conditions.
